

KARTIKEY DAVE

Python Developer

In my opinion, what defines a **Python Developer** is responsible for the coding, designing, deploying, and debugging development projects, typically on the server-side (or back-end). They may, however, also help organizations with their technological framework.

03/2021 - 04/2021,

Achievements/Tasks

- Underwent a one-month training on Python and Django.

TECHNICAL SKILLS:

Languages: Python, Django, JavaScript, HTML5, CSS3, Bootstrap4

Development tools: Microsoft Visual Studio, Pycharm, Jupyter Notebook, Notepad++

DB Language: MYSQL, PL/SQL

PERSONAL PROJECTS

Django Blog

- Developed a Django Blog which is accessible for all the people who love to write blogs and post them on a working web page. My project includes all the technologies like creating, editing, deleting, and updating blogs. Along with this, I've also added a commenting and replying feature that would help the bloggers to check their corrections and mistakes in the blog and help them to create more appropriate blogs for the readers.

Student Admin Panel

- The software includes important features such as login/logout services, recent Student add, updates, deletion, and online help. The administrator can access all features of the system. PHP, MySQL, Bootstrap, JQuery, HTML5, CSS3 was used to develop the project.

Plan My Career

- Plan My Career is a static web page that I've made to improve and nourish my web designing skills. This project is helpful for people who want to read blogs about how to plan their careers in appropriate and more decent manner.

Jaipur Virasat Hotel

- In this project, I've built a Static website of Jaipur Virasat Hotel in which users can fill the online application form to book his/her stay at the hotel. I've used JavaScript, Bootstrap, JQuery, HTML5, CSS3 to build this Website.
